

CIM VERSION 2.1 TO BE RELEASED WITH CLASSIC 9.1

Now Works with both Classic 8.x and Classic 9.x

Download a preview copy of CIM version 2.1 today.

Try it with your existing Classic 8.x or 9.x installations. The preview copy includes the new Classic Archive Manager (CAM) and the new "Normalized Excel" output option.

Preview for 30 days and 50 uses.

Registered CIM users can replace version 2.0 with version 2.1. Unregistered CIM users who previously installed version 2.0 can install version 2.1 and use it an additional 50 times. Users who never installed version 2.0 can install version 2.1 and use CIM & CAM for 30-days and 50-uses.

Download the preview release of Classic Information Manager (CIM) version 2.1 .

With no other applications running, double-click the cimsetup.exe file to start the installation process. It takes only seconds to complete.

Please note that if you have already installed Classic Information Manager 2.0 and you wish to install the updated version from the web, you should first uninstall the previous version. To uninstall first stop all running applications, and then use Start >> Settings >> Control Panel >> Add/Remove Programs. Select "Great Plains Classic Information Manager" and then click the "Add/Remove" button. If you are running a registered copy of CIM don't forget to write down your registration name and registration code before uninstalling the software! If upgrading from CIM 2.0 you must upgrade all users to CIM 2.1 at the same time to avoid version conflicts.

Current Cim And Cam Pricing

\$395 single-user \$495 2-5 users \$595 6-10 users \$695 11+ users

New Features Included In Cim Version 2.1

1. The Classic Archive Manager. Easily create and maintain report archives. Use all Classic Information Manager features to View, Print, and Search archived reports. Currently registered CIM 2.0 users will receive a free copy of Classic Archive Manager with a free upgrade to CIM 2.1.
2. Now works with both Classic 8.x and Classic 9.x. Immediately begin evaluating and using Classic Information Manager with your existing Classic 8.x installations, and then easily switch to Classic 9.x when they are ready. Exactly the same functionality for both Classic 8.x and Classic 9.x.
3. ALL General Ledger Financial Statements are now available in Excel and Excel PDF formats. (Excel PDF requires the full Adobe Acrobat product.)
4. "Security" identical to Classic's security has been fully implemented within CIM.
5. "Normalized Excel" report output. This new Excel output format automatically extracts and formats the data in the body of selected Classic reports. It optionally allows users to easily select fields from within the body of a Classic report and then order these fields prior to producing an Excel spreadsheet containing the selected fields. Subtotals and counts are automatically created.
6. CIM now includes support for the latest versions of the optional CIM Helper Applications. CIM now works with Word XP, Excel XP, Internet Explorer 6.0, Netscape 6.1, Acrobat Reader 5.0, and the full Adobe Acrobat 5.0. All Helper applications are entirely optional, and they are automatically sensed by CIM each time the application starts up..3 of 3

Some Of The Expanded And Improved Cim Features

1. Print any report to any Windows printer in either landscape or portrait. View all reports full width. The ability to create Adobe PDF versions of reports continues to be included for FREE.
2. Fast and powerful multi-file Search function to quickly find information buried in reports
3. Use the InstantViewer application to immediately and automatically view or print any Classic report printed to disk. You never have to leave where you are in Classic to view or print reports printed to disk. And the InstantViewer application automatically remembers your last 10 reports.
4. Five Date Filters: (1) before, (2) between, (3) after, (4) last # of days, and (5) ALL dates.
5. Four Sort Orders for viewing reports: (1) Title, (2) Date Created, (3) File Name and (4) Report #.
6. Expanded use of tool bar icons to quickly access frequently used functions and options.
7. Easily **BOLD** the HTML, PDF, Word, Word PDF, print previewing and printer outputs.
8. Delete widowed spool file records, add back widowed reports, and delete reports printed to disk.
9. "Filter" for only those reports that can be converted to an Excel output format (see the list below).
10. Filter for reports only in the Classic Spool file, "widowed" reports not in the Classic Spool file, or include both types of reports (the default) in your filtered set of reports. Download and install the full CIM 2.1 and CAM evaluation version today. Try them FREE for 30-days and 50-uses.

The new install allows an additional 50 uses beyond the end of the 30-day evaluation period. So even if you are beyond the original 30-day evaluation period and have not yet purchased CIM, you can still experience the new features of CIM and CAM. Spend time using CIM and CAM with your existing 8.x and 9.x reports "printed to disk". See for yourself all the benefits CIM and CAM have to offer.
