Dynamics

## Seagate Crystal Reports

Seagate Crystal Reports and Great Plains Dynamics deliver a winning combination to you. Great Plains offers Seagate Crystal Reports to give you the tools you need to effectively analyze your data and make strategic business decisions. Now you can quickly link, retrieve, and view Dynamics tables and fields with Seagate Crystal Reports.

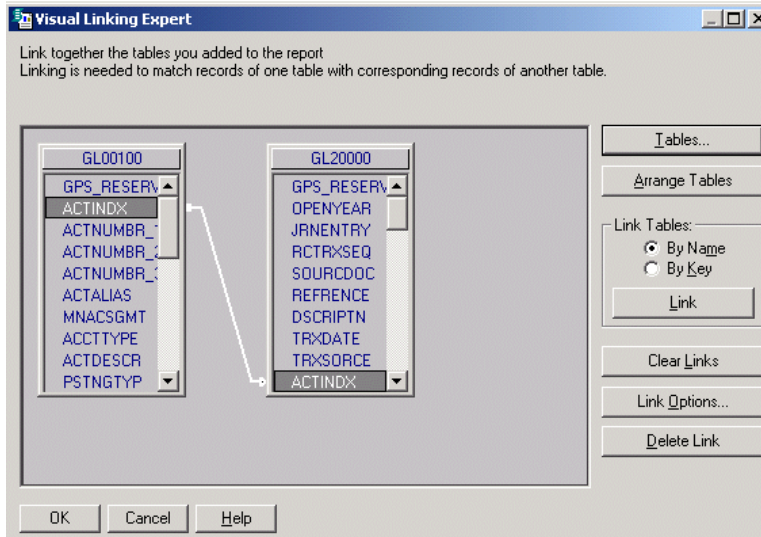

If you need more comprehensive analysis, Seagate Crystal Reports enables you to combine Dynamics information with other data you have stored for quick data access and analysis. Once your report is complete, you can share your results by distributing your report to anyone, wherever and whenever they need it.

*Complete analysis is easy with instant access to data using Dynamics tables to create your Crystal Report.*

### Create presentation-quality reports quickly and easily with Seagate Crystal Reports for Dynamics

**Fast and easy report creation:** Today's databases can be complex, but creating a simple report shouldn't be. With Seagate Crystal Reports for Dynamics, you can draw upon built-in report "experts" to step you through the creation of professional, high-quality reports. New reports are a snap as you are guided through connecting to your Dynamics information, selecting fields and records, sorting and formatting.

*Quickly and easily link fields together from different tables into one report.*

**New Crystal Report Add-ins:** Crystal report add-ins for Microsoft Excel and Access allow you to easily create your reports in a familiar environment and then place these into a "tools" menu to be accessed and used anytime Excel or Access is run.

**Interactive analysis for in-depth investigation:** Sometimes the real story is hidden somewhere in your data - you just need to be able to reveal it. Seagate Crystal Reports for Dynamics gives you the tools to examine trends, expose relationships or zero in on important facts.

**A new flexible distribution, however and wherever you need it:** When your report is complete, Seagate Crystal Reports makes it easy to send it just about anywhere, in practically any format. Export your reports to a wide variety of popular formats including Microsoft Word and Excel, HTML or even send them via e-mail. Compile reports into standalone applications for interactive viewing, distribute reports via the Web using advanced web reporting technology, or just print them out as hard copies.

**Advanced web reporting:** Seagate Crystal Reports leverages the power of your intranet to provide report access to all users, regardless of platform or location. Small workgroups can share existing reports using their Microsoft, Netscape or other ISAPI, NSAPI or CGI compliant web servers and the Crystal Web Server components that are included. Users with compatible browsers can view live, presentation-quality reports using either Java or ActiveX-based Smart Viewers with full navigation and local export capabilities. True multi-platform client support is provided with additional plain and frame-based HTML viewers as well.

**About Seagate Software:** Seagate Software develops tools and applications in the areas of Business Intelligence and Infrastructure Management, including network systems and storage management. Our suite of data access and analysis products provide query and reporting, OLAP, statistical analysis and other technologies that help you transform data from databases and data warehouses into decision-making information.
