

FIXED ASSET MANAGEMENT

B E N E F I T S

Take control of your company's assets and put them to the best possible use in your organization with the asset management capabilities you need to effectively track, analyze, and manipulate those assets to make them work for you.

Enter

a range of asset information, including acquisition date, cost, and physical location, as well as assign assets to multiple books for calculating depreciation.

Manage assets more effectively

Quickly and accurately record, track, depreciate, and analyze your company's assets with minimal effort and tremendous flexibility using multiple features and powerful reporting tools.

Save time and money

Set up assets quickly and easily and use classes or account groups to save effort by setting defaults and making mass changes, such as retirement or depreciation, to large numbers of assets at the same time.

Put your information to work

Make changes to one or many assets easily and capture necessary asset data for tax or reporting purposes while performing depreciations, averaging, or comparisons across assets.

Find the information you need

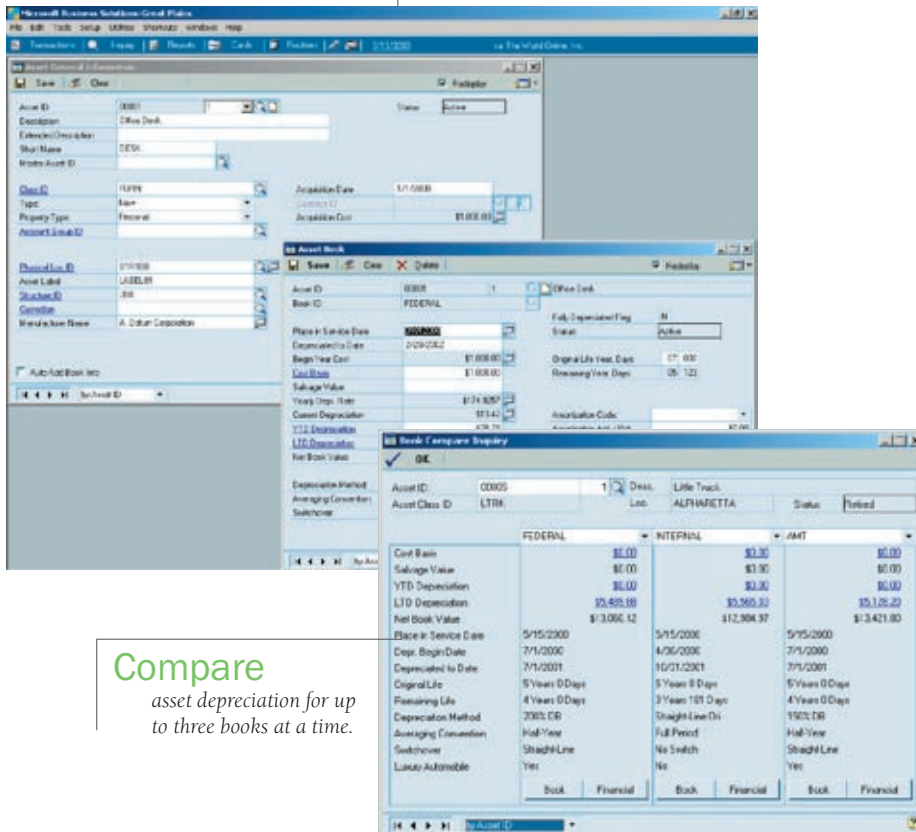

Access the data you need with an intuitive graphical user interface and convenient one-button access to user-defined information or other critical data, including asset maintenance, purchase, lease, and book information.

Make depreciation easy

Manage asset depreciation with any of 16 depreciation methods, with the ability to back depreciation out, recalculate it, add additional depreciation, or project it ahead for any number of assets in your books.

Integrate powerfully

Empower your business by combining Fixed Asset Management with other Microsoft® Business Solutions–Great Plains® applications, ensuring accuracy while reducing redundant data entry.

Compare

asset depreciation for up to three books at a time.

FIXED ASSET MANAGEMENT | FEATURES LIST

Easy Asset Setup	Create and manage an unlimited number of books of assets for each company, including corporate, federal tax, alternative minimum tax, and more.
Intuitive Interface	Find asset information using an intuitive graphical user interface with one- button access to maintenance, purchase, insurance, lease, book, or other critical information.
Customized Setup	Add up to 15 user-defined fields to track any industry-specific information that you need, set defaults and formats to meet business needs, and hide or display fields as needed.
Asset Tracking	Track comprehensive information about assets using standard or user-defined fields, in multiple quantities or by an asset component like master ID number or asset suffix.
Asset Classes	Define asset classes to set defaults for a group of assets, as well as set characteristics such as depreciation or asset retirement for multiple assets at one time.
Averaging Conventions	Utilize a variety of averaging conventions for managing assets including averaging by half year, mid quarter, full month, full period, full year, and others.
Depreciation Management	Use any of 16 depreciation methods such as straight line, remaining life, and amortization, and forecast your depreciation expenses for budgetary work.
Asset Review	View and analyze in-depth information about assets on-screen including asset account, lease, insurance, or user data, or drill down to the originating transaction to look at greater detail.
Asset Manipulation	Manage assets with powerful tools for adding or changing assets such as retirement, transfers, and making mass changes to multiple assets.
Reporting Flexibility	Share information with a wide variety of standard reports such as depreciation ledgers, property transfer, inventory list, and asset retirements. Create custom reports using SmartList, Report Writer, and Crystal Reports®.
Property Management	Manage physical inventory and asset movement with location IDs providing reconciliation of an asset's actual physical location to the recorded physical location.
Integration	Update the General Ledger automatically with Fixed Asset Management information and integrate with asset information from Great Plains Purchase Order and Payables applications.
